

RSVP

RETAIL SHELF VERIFICATION PROGRAM

Frequent price changes can cause shelf tags and POS systems to fall out of sync, leading to errors and unhappy customers. RSVP solves this by catching discrepancies as you scan tags, keeping prices and warehouse indicators aligned.

SIMPLE, NO SETUP NEEDED

We turn on the service—no installation required. Your handheld scanner does the work. It supports base labels, promotional talkers and audit mode. If you're on our POS Host or Data Exchange service, updates happen automatically. You'll have access to reports to track accuracy. No installation fees, no extra steps—just accurate pricing, every time.

RSVP DELIVERS

- Pricing accuracy
- Pricing integrity at the shelf (customer point of view)
- Outstanding ROI

RSVP BENEFITS

- Validates tag accuracy every time barcode is scanned
- Reduces "shrink" associated with incorrect shelf labels or un-applied POS batches
- Integrated with POS Host, Data Exchange and label printing services including Electronic Shelf Labels
- Any sidestream item will be automatically checked for the appropriate LOD indicator

REQUIREMENTS

- Retail Pricing Management and Label programs
- UNFI handheld device
