

AISLE iQ

Aisle iQ is a web-based analytic software tool that drives labor savings and improves product movement. This tool empowers your store employees to hang tags or pick orders in a fraction of the time! How you ask?

How It Works:

Aisle iQ generates tags in perfect “walking sequence” utilizing PAL (Product Aisle Location) Data.

Imagine every tag in your store is assigned with an “Aisle and Shelf Address”.

Example: 3A51 =
Aisle 3
Side A
Section 5
Shelf 1

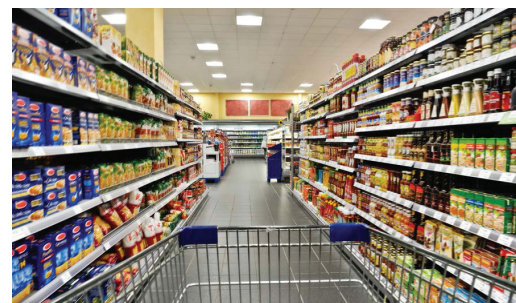

Store Managers and employees are amazed with the simplicity and the time savings this program offers!

Example of walking and hanging sequence:

AISLE iQ

Real-Time Shelf Analytics:

- Exact Product Count on every shelf
- Exact Facing Count for each product on the shelf
- Gross Sales for each section and shelf

Key Benefits:

- Reduce store labor by creating picking lists in walking sequence for on-line orders
- Improve negotiations with vendors by comparing sales of competitive product lines
- Use PAL (Product Aisle Location) to provide real-time shelf analytics to create POGs (Plan-o-grams)
- Utilize Aisle iQ store mapping to see exactly where every product is in every location
- Utilize Aisle iQ color coding to determine item movement (Green=selling well, Yellow=Average, Red=not selling)
- Increase sales by replacing items with low or no movement with high volume items

Customer Benefits:

Prior to shopping, customers can do real-time product searches on AisleiQ.com. Search results will provide the stores located in their geographic area along with the product locations in each store.

Requirements:

- Windows, iOS/Apple & Android Applications are all supported.
- Aisle iQ labels integrate with Bartender, Designer Labels (RTI), Vestcom, and other well-known label vendors.
