# SCAN PAY GO MOBILE CHECKOUT

Convenient, Contactless Mobile Checkout

Scan Pay Go from FutureProof Retail is a mobile checkout process that allows customers to scan items with their smart device as they shop. Eliminating the need to follow the traditional checkout format creates efficiencies for both customers and retailers. This innovative app brings the ease and convenience of eCommerce shopping to physical stores.

Retailer Benefits

• **Higher Sales:** Customers visit more often and buy more knowing they can shop quickly and skip the line.

• **Personalized Marketing:** Get accurate data on shopper preferences, send customized offers, and reach shoppers in the aisle and outside of the store. Send personalized offers and suggest complimentary specials.

• **Fast and Easy Setup:** Proven best practices take the guesswork out of launching your program with support all along the way.
  1. Pick Your Plan
  2. Setup & Test
  3. Launch Options

• **Low cost to enter:** Cloud-based software as a service. No expensive hardware, minimum setup costs and transaction fees.

WHY CHOOSE UNFI?

• Reduced transaction costs

• Simplified billing via UNFI's automated bill-thru service

• Access to UNFI's expert Retail Technology consultant team

SCAN PAY GO MOBILE CHECKOUT

Retailer Options for App (Choose one):

• Universal application that has generic branding until it detects the shopper is in your store, at which point it adopts your brand and offers shoppers access to your specific capabilities. Designed to support the needs of smaller merchants who do not require a white label.

• Private white-label where you own all the branding and the install including colors, logos, app store pages and related microsites and services. Private white-label is deployed via your own dedicated apps on the app store, allowing you to own the install on your customers' devices.

Checkout Options:

Choose between these two checkout methods depending on your size and needs:

• Direct customers to scan a code to check out, or
• Allow customers to check out anywhere in the store

Loss Prevention Tactics

• Shopping with Scan Pay Go requires a valid email address and photo ID
• The app's trust algorithm flags some or all purchases for audit depending on retailers' preferences
• Age-restricted items are flagged to assure checking of ID for alcohol and better customer service

FAST FACTS

99.8%

of bagged items were self-scanned accurately across thousands of audited purchases.

53%

of shoppers say they plan to shop at stores that offer contactless shopping.

TESTIMONIAL

"@FairwayMarket You guys nailed it with the mobile checkout app! Saving me so much time. Thank you!"
